STG - (A) United States patent  
AB - An apparatus for protection of the scalp, facial skin, eyes, mouth and nostrils from hair dye, coloring and other chemical products for hair treatment. The covering includes an absorbent pad designed to be worn against the wearer's forehead so that any liquid runoff from hair treatment is absorbed by the pad. The apparatus preferably includes a substance or device to hold the pad in place, such as an adhesive which attaches the pad to the forehead, or ear handles wherein the pad may be worn as one might wear a pair of goggles. Additionally the pad may be enclosed in an impermeable lining such that any liquid absorbed by the pad may not later escape. Several of these pads may be constructed together to form a continuous series or strip of pads. Each pad is then designed to be easily detachable from the remainder of the series. This facilitates convenient storage and removal of the pads.
